Portfolio

JOB EXPERIENCE

Assistant System Engineer
Smart Technologies (BD) Ltd.
Dec 2024 – Present

- Supporting server deployment and configuration
- Performing system health checks and troubleshooting.
- Working with HPE ProLiant servers and storage.

SKILLS

- **Cisco Packet Tracer**
- **RHCSA** (Ongoing)
- **CCNA** (Ongoing)
- **MS SQL Server**

ACHIEVEMENTS

IP Addressing and Subnetting - Zero to Hero

STRENGTHS

Teamwork,Time Management, Leadership, Problem Solving.

INTEREST

System Engineer, Network Engineer, Cyber Security, CEH, Database Management.

EDUCATION

BSc. - Computer Science and Engineering — **2019 - 2024**
Ahsanullah University of Science and Technology

CGPA: **3.195**

HSC - Science — **2017 - 2019**
Birshreshtha Munshi Abdur Rouf Public College

GPA: **5.00**

PROFESSIONAL QUALIFICATIONS

- **HPE Standard ProLiant and Blade Server Service and Solution Qualification**
- **HPE StoreEasy Proliant-Based NAS Service and Solution Qualification**
- **HPE Modular Storage Arrays (MSA) Service and Solution Qualification**
- **Storage Foundation Test**
- **HPE Alletra 4000 Service and Solution Qualification**
- **HPE StoreEver ESL Gen3 Tape Libraries Service and Solution Qualification**
- **HPE StoreEver MSL Tape Libraries and 1/8 Autoloader Service and Solution Qualification**
- **HPE StoreFabric M-Series Ethernet iSCSI Switches Service and Solution Qualification**
- **HPE Aruba OS-CX Service and Solution Qualification**
- **FCIA-Fusion Server, xFusion**

KEY PROJECTS

- **iBAS++ Superdome Deployment (Govt Project)**
- **City Bank PLC – Data Center Shifting**
- **GIB PLC – Data Center Shifting**
- **bKash – 11 Server Deployment Project**
- **Election Commission - PAM Project**

PROJECTS

Easy Home

Tool: C#, HTML, CSS
"Easy Home" is a web application that connects landlords with individuals in need of emergency accommodation, allowing for seamless online renting. It provides detailed listings including room facilities, prices, and reviews for a hassle-free rental experience.

Open-OPD

Tool: Web Development, Typescript, Java, DBMS
Ensure a seamless patient experience from booking to follow-up.Facilitate effective connections between patients and doctors and generate reports for organizational insights.

Smart vehicle speed limit enforcement system: A vehicle speed detecting and speed breaker control system

Hardware: Arduino UNO, Bluetooth Module, RFID module, Servo Motor, Sonar Sensor,LED, Resistors & Interface: C
Enhance highway safety by using ultrasonic sensors, RFID readers, and automated speed bumps to detect and control overspeeding vehicles in each lane.

THESIS

Deep Learning-Based Disease Detection in Citrus Plants: A Comparative Analysis

using YOLO
Developed an object detection model using YOLO to identify objects in images with high speed and accuracy, providing a foundation for future real-time applications in video and live-stream detection.

Comparative Analysis of Deep CNN Models in the Classification of Pulmonary Diseases

using ResNet50, InceptionV3, DenseNet201 and Ensemble
Classified pulmonary diseases using CNN models on X-ray images, achieving high accuracy with DenseNet201 and InceptionV3, and emphasizing future potential in advanced model exploration.
